

AVAILABLE NOW !

HIGH CAPACITY BATTERY ! 37V14Ah = 518 Wh Li+polymer battery still fitted in the same ABS UL plastics casing. Weight is 3.8 kg / 8.4 lbs. This means eZeebike can now cover a distance of at least 56 km with very high ratio of power assist.

We have the following batteries in new ABS UL plastics casing with built in lock that fits into our purpose built rear battery carriers.

37V10Ah = 370 Wh Li+ polymer battery

37V8.1AH = 300 Wh latest Lithium Iron Phosphate battery, (LiFePO₄ or LFP), with original cathode material from **Phostech Lithium**. With over 1000 cycles life, It's guarantee for 2 years.

With NO price premium!

37V 10Ah = 370 Wh LiMnO 18650 battery cells from Samsung Korea, with high 20 amps max. continuous capability and over 500 life cycles. Available In both standard and flat battery casing.

48V 8Ah = 384 Wh LiMnO 18650 battery cells from Samsung Korea compatible with our new advance controller that will convert current motor to 500 watts nominal power with a peak of 1000 watts, for those interested in getting higher speeds and torque.
